

OAS Test Preparation

March 2, 2007

Amana Academy prepares for the CRCT in April! School-wide (except KG), we have been using the OAS test practice questions available online.

Every teacher has sent home the OAS Parent/Student Quickstart, plus the log-in numbers, for your child. Your child may do the teacher-created tests, or the randomly-generated tests for his/her grade level in each subject. The students have been taught how to do this in our computer lab. In some classes, the tests have been printed out to be given to your child on paper rather than online.

Either way, it is great practice to familiarize your child with the test format and to review the subject matter.
